Not Shown: Drill a hole in the bottom plywood for routing power adapter cable. Add 4 rubber feet and a handle to the back. Use small screws to attach plywood. Round over the edges, counter-sink the screws and add wood plugs for a cleaner look.

DIMENSION DETAIL

PLEASE NOTE: The dimensions for this plan are reasonably accurate to our video build. Actual building measurements may vary slightly. Always pre-assemble pieces before gluing or attaching screws. Lay out lines on cardboard or paper for more building accuracy, then cut your wood pieces from your layouts.
